Statement

I am a photographer, artist and performer whom has been pro-active in the arts since graduating in 2002, currently involved with the NOPARKING Collective of Artists as well as a musician in The Dust Collectors. As an artist I research the spaces that surround us, moments in passing and spaces that affect our day-to-day existence. My interests mainly cover themes within the nocturnal city as well as marginal and internal parts of the urban landscape. I am currently undertaking research for a new project using sound recordings and vintage tape/film as well as using sketching within my work.
